STOP STEALING DREAMS

WHAT IS SCHOOL FOR?

SETH GODIN

Everyone wants to change education, but no one wants to do anything about it.

The essay at the heart of this book is called Stop Stealing Dreams. It's one of the most powerful and popular things I've ever written. It's a call to action for parents and students, a wake up call to help each of us move forward.

When HP offered to print a limited edition booklet for me, I thought it would be helpful to put this manifesto in your hands, in a way that's easy to highlight, underline and share.

At the same time, I want to share what we're doing with altMBA. It's a small contribution, a step in the direction of education that actually works.

Seth Godin
Hasting-on-Hudson, NY
August, 2018

17 REINVENTING SCHOOL

If the new goal of school is to create something different from what we have now, and if new technologies and new connections are changing the way school can deliver its lessons, it's time for a change.

Here are a dozen ways school can be rethought:

It's easier than ever to open a school, to bring new technology into school, and to change how we teach. But if all we do with these tools is teach compliance and consumption, that's all we're going to get. School can and must do more than train the factory workers of tomorrow.

- **Homework during the day,** lectures at night
- **Open book,** open note, all the time
- **Access to any course,** anywhere in the world
- **Precise,** focused instruction instead of mass, generalized instruction
- **The end of multiple-choice** exams
- **Experience** instead of test scores as a measure of achievement
- **The end of compliance** as an outcome
- **Cooperation** instead of isolation
- **Amplification** of outlying students, teachers, and ideas
- **Transformation** of the role of the teacher
- **Lifelong learning,** earlier work
- **Death of the nearly famous college**

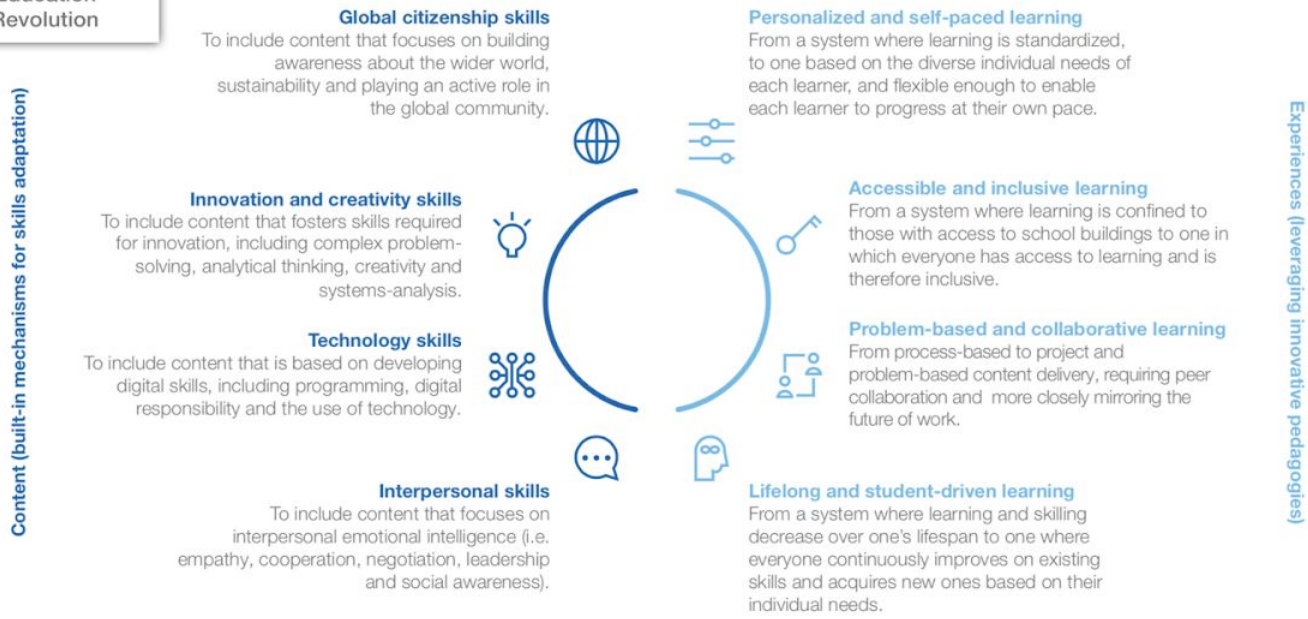
The Problem

This problem has been highlighted in the 2020 World Economic Forum white paper, on the need for a 21st Century Education system

Schools of the Future
Defining New Models of Education for the Fourth Industrial Revolution

WORLD ECONOMIC FORUM
COMMITTED TO IMPROVING THE STATE OF THE WORLD

Figure 2: The World Economic Forum Education 4.0 Framework



Our Solution

We deliver a personalized life long education system with an AI-driven Edtech platform and a 21st Century curriculum

Edtech Platform
Genie AI Assistant creating a personalized pathway

Accredited Courses
Certified courses to US university degrees

Global Faculty
Including teachers, CEOs and bestselling authors

Global Community
Connecting students with companies and mentors

Daily Calendar
Daily live and virtual events to learn and earn

100 Year Curriculum
Equipping students with highly relevant skills

Our Edtech Platform

Our GeniusU Edtech platform includes assessments algorithms which provide us with intelligent data on each student's interests, entrepreneur level and social connections.

Genie, GeniusU's A.I. virtual assistant, gives each student and faculty member personalized recommendations on what courses to take, how to upskill, who to meet and where to go based on their step in the curriculum, their stage of business growth, global location and interests, together with their personal values, vision, passions, talents, and purpose.

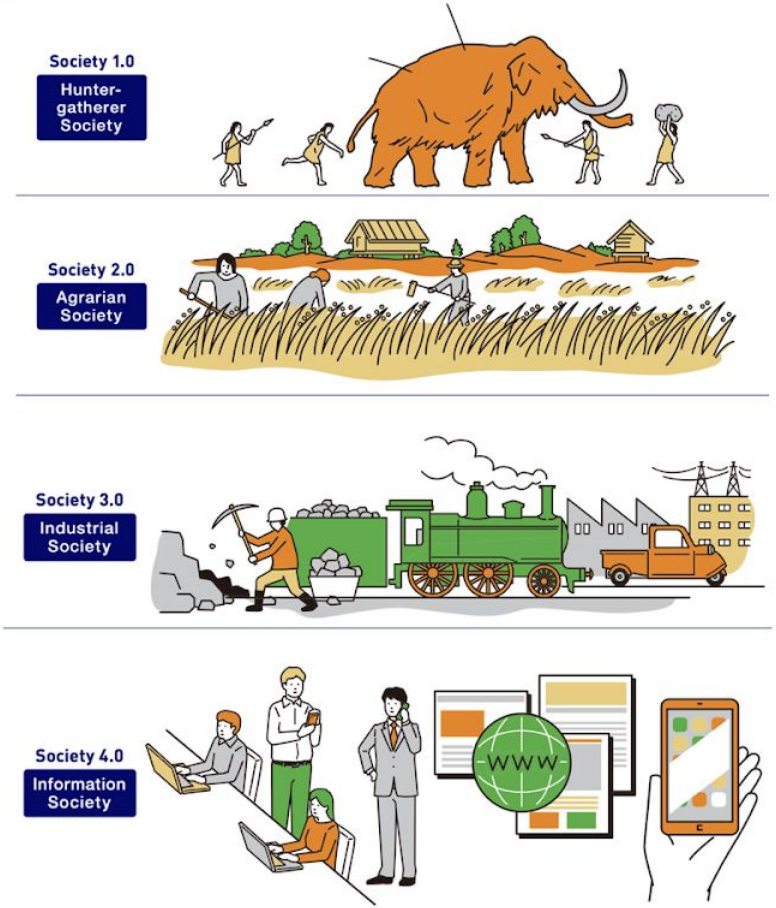
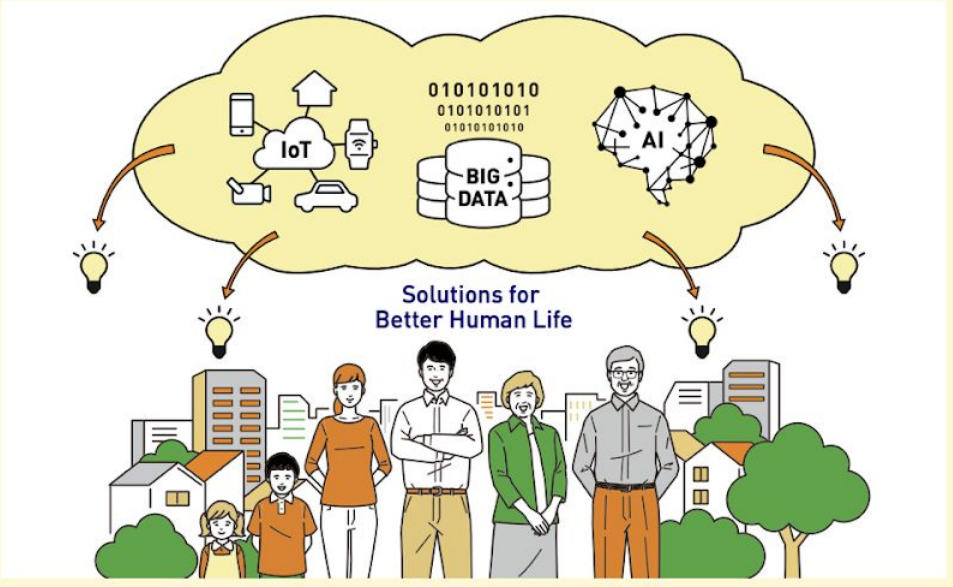
TOP TREND NO.1
EDUCATOR 5.0

SOCIETY 5.0 THE 5TH REVOLUTION



Entering Society 5.0



Big Data collected by IoT will be converted into a new type of intelligence by AI and will reach every corner of society. As we move into Society 5.0 all people's lives will be more comfortable and sustainable as people are provided with only the products and services in the amounts and at the time needed.

SOCIETY 5.0 AN ENTREPRENEUR BLUEPRINT

Japan's 'Society 5.0' initiative is a road map for today's entrepreneurs

Boldly identified as "Society 5.0," Japan describes its initiative as a purposeful effort to create a new social contract and economic model by fully incorporating the technological innovations of the fourth industrial revolution. It envisions embedding these innovations into every corner of its ageing society. Underpinning this effort is a mandate for sustainability, bound tightly to the new United Nations global goals, the SDGs. Japan wants to create, in its own words, a "super-smart" society, and one that will serve as a road map for the rest of the world.

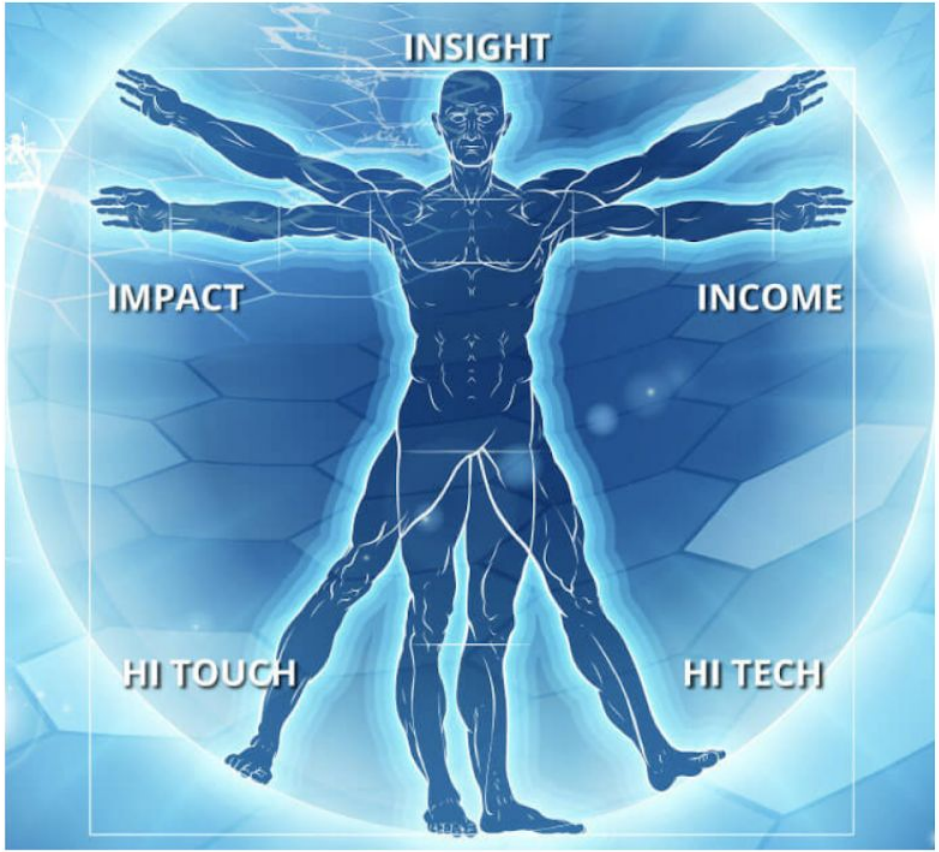
Japan hosts its first-ever G20 summit in 2019, and this grand initiative will be on the agenda at the official B20 (Business 20) summit headed by the chairman of **Hitachi**.

ENTREPRENEUR 5.0 5 FUNDAMENTALS

Entrepreneur 4.0 chose between employee or employer. Between being a tech startup, social entrepreneur or digital nomad. Between online or offline.

Entrepreneur 5.0 creates a job instead of getting a job: As both employee and employer. They value making money, making a difference, and living their best life: Income, impact and insight.

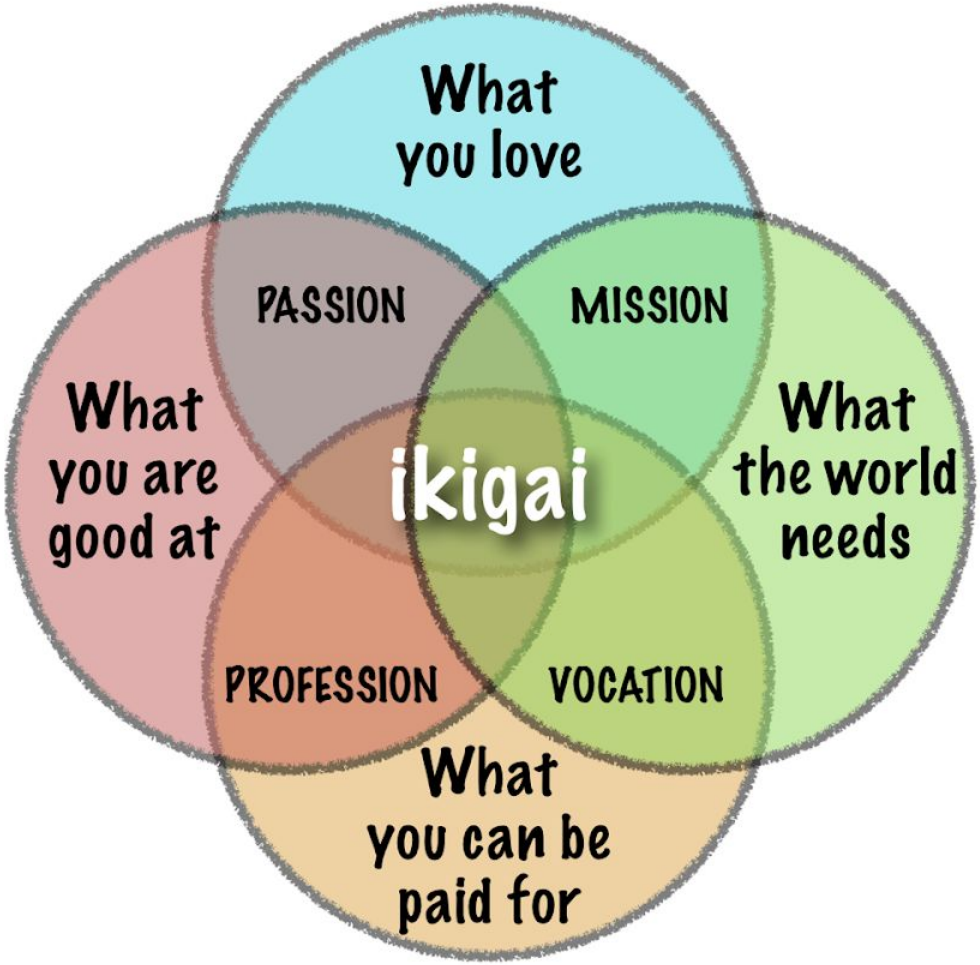
They use AI, AR and the digital layer to be both offline and online, hi touch and hi tech. They are the new renaissance man and woman.



生き甲斐
i k i g a i

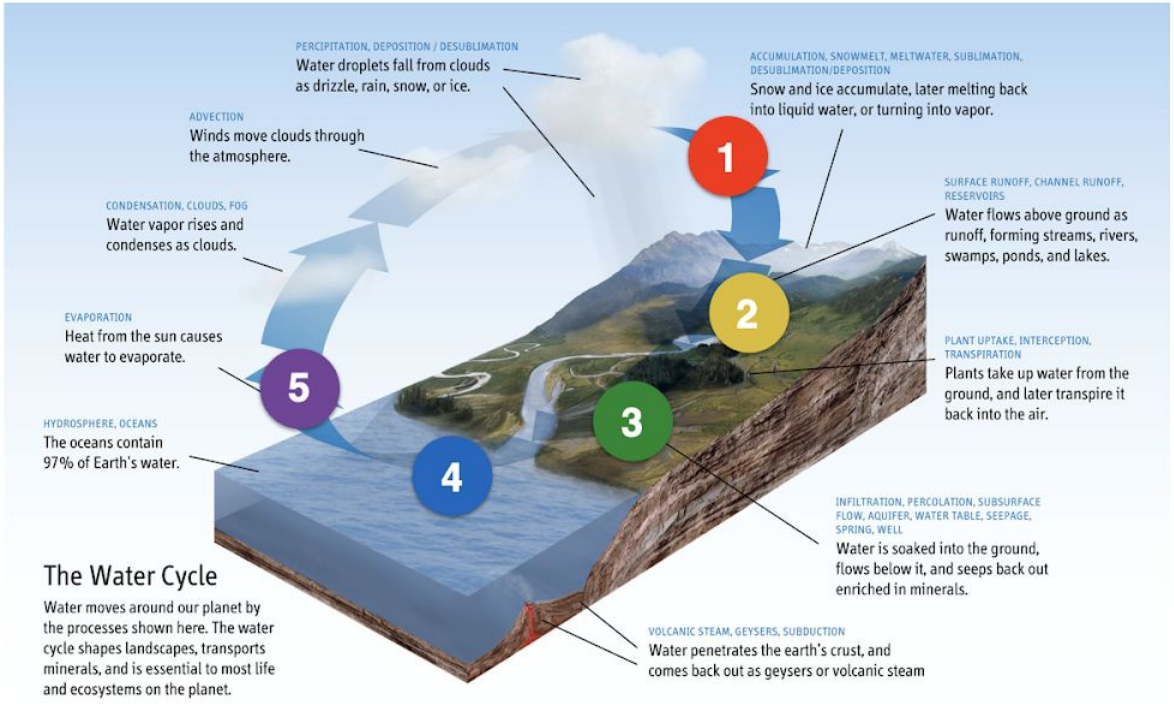
ikigai is the Japanese concept of **"a reason for being."** Everyone has an ikigai. To find it requires a journey of self discovery. But the search is worth it.

Your ikigai is the meaning to your life.



ENTREPRENEUR 5.0 THE VALUE CYCLE

Entrepreneur 4.0 focuses at 'funnels', which assumes a limitless flow of new customers. Entrepreneur 5.0 focuses at 'cycles' which takes into account the full cycle of customers, trust, team, time and money.



ENTREPRENEUR 5.0 5 STEP CYCLE

Entrepreneur 4.0 have to choose between non-scalable offline customer pathways for high value products or scalable online customer pathways for low cost products. And even workable pathways fall in effectiveness over time. Entrepreneur 5.0 combines high tech and high touch to create predictable, automated, self-improving pathways that use AI and human connection to scale effectively and sustainably.

1	2	3	4	5
Followers	**Community**	**Prospects**	**Customers**	**Raving Fans**
Diamond	**Gold Dust**	**Experience**	**Transformation**	**Golden Halo**
What is your 5P **diamond** that sparkles from a distance? This is your story that attracts the **attention** of new followers from multiple sources	What is your zero cost, scalable **gold dust** that grows and engages your community to invest their **time** and share in trackable ways?	What is the hi-touch, hi-tech **experience** you are delivering so prospects can build trust in your problem-solving and make a **decision** to buy?	What is the hi-touch, hi-tech **transformation** that all your customers will have that's worth their **money,** so they return and recommend you?	What is the global **golden halo** you nurture around your pathway that creates automatic, self-improving **growth** in your customers and partners?

A learning networks will disrupt and reorganise learning institutions in the same way social networks have disrupted and reorganised social institutions.

While social networks have led to exponential growth in how we receive and share information as a group, learning networks will lead to exponential growth in our development as a group.

Learning networks are not just networks for learning, but networks that learn. By rapidly sharing what works now, everyone in the network learns exponentially.

Youtube and X Games has allowed the tricks and feats in extreme sports to grow exponentially as athletes learn new discoveries from each other.

Indiegogo and Kickstarter has allowed start-ups to ramp up the funding they can raise exponentially by sharing and learning best practices from the best.

GeniusU will allow entrepreneurs to learn the best ways to access resources and grow their businesses by sharing and learning the latest successful strategies from each other.

More than 12 million people attended Travis Scott's Fortnite concert

A record breaking performance

By Andrew Webster | Apr 23, 2020, 11:41pm EDT

Travis Scott's first virtual performance wasn't just spectacular — it also broke a record. This evening developer Epic Games revealed that the concert, which took place inside of *Fortnite*, saw 12.3 million concurrent players participate. The developer says this is "an all-time record" for the battle royale game. The previous record holder was last year's Marshmello concert, which topped 10.7 million virtual attendees.

The Metaverse Is Coming And It's A Very Big Deal

Cathy Hackl Contributor ⓘ
CMO Network
I'm a tech futurist focused on AR, VR, & AI. Views are my own.

Will Facebook Horizon be the first step toward the metaverse?

Dean Takahashi @deantak September 18, 2020 7:30 AM **AR/VR**

Our Metaverse Strategy

Our first mobile app will be built with the Unity AR/VR Engine. Unity is the world's most popular virtual world engine, used to build Angry Birds, Pokemon Go, Facebook Horizon and 60% of the games on the Apple App Store. Our plan is to build GeniusU into a virtual universe where students and mentors meet in AR/VR and building their learning communities and keep their learning libraries.

SUPERHUMAN AI

The "Father of Artificial Intelligence" Says Singularity Is 30 Years Away

by **Jolene Creighton** on February 14, 2018 11124

At the World Government Summit in Dubai, I spoke with Jürgen Schmidhuber, who is the Co-Founder and Chief Scientist at AI company NNAISENSE, Director of the Swiss AI lab IDSIA, and heralded by some as the "father of artificial intelligence" to find out.

He is confident that the singularity "is just 30 years away, if the trend doesn't break, and there will be rather cheap computational devices that have as many connections as your brain but are much faster," he said.

Today, the world faces a number of hugely complex challenges, from global warming, to the refugee crisis. These are all problems that, over time, will affect everyone on the planet, deeply and irreversibly. But the real seismic change, one that will influence the way we respond to each one of those crises, will happen elsewhere.

"All of this complexity pales against this truly important development of our century, which is much more than just another industrial revolution." Schmidhuber says. "It is something that transcends humankind and life itself."

1 The accelerating pace of change ...

Agricultural Revolution ← 8,000 years → Industrial Revolution ← 120 years → Light-bulb ← 90 years → Moon landing ← 22 years → World Wide Web ← 9 years → Human genome sequenced

2 ... and exponential growth in computing power ...

Computer technology, shown here climbing dramatically by powers of 10, is now progressing more each hour than it did in its entire first 90 years

3 ... will lead to the Singularity

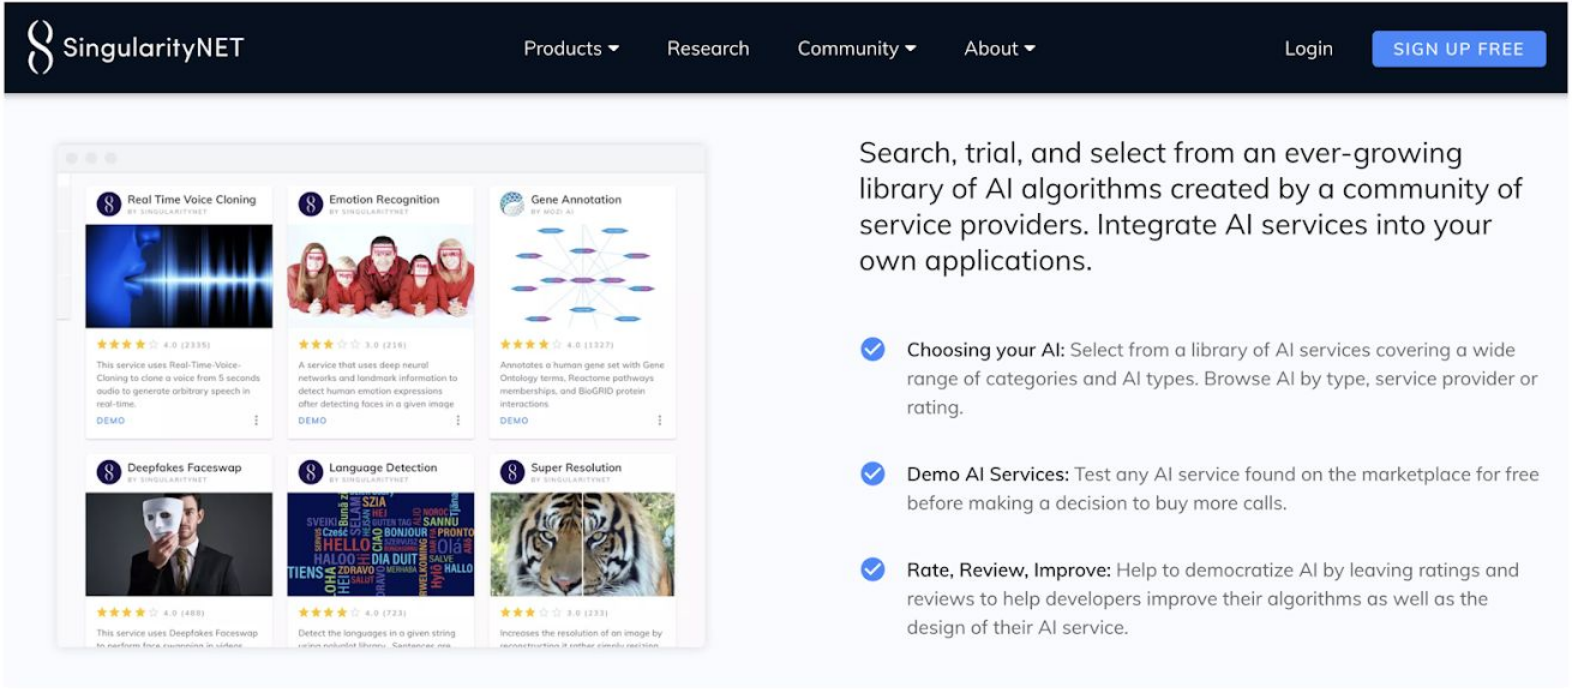
Our AI Strategy

Our plan is to build a decentralising AI development environment to grow GeniusU and Genie, as part of SingularityNet: The world's largest blockchain based AI community.



SingularityNET

SingularityNET (AGI) rallies 1,000% as industries aim to merge AI with blockchain

The price of SingularityNET's AGI token has been on the move as DeFi capabilities, cross-chain integrations and layer-two functionality drive demand higher.

One AI-focused cryptocurrency project that has seen tremendous growth since the beginning of 2021 is SingularityNET and its talented humanoid robot named Sophia.

AI developers can utilize the SingularityNET platform to create, share and monetize their services through its AI marketplace, which allows users to browse, test and purchase those services using SingularityNET's native AGI token.

Platform Component Integration

SingularityNET is a full-stack AI solution powered by a decentralized protocol. The platform comprises of many elements working together which can be fully integrated into your own applications.

Open source Platform Development

Participate in our open source community and contribute to the overall development of the platform and gain access to our comprehensive resources platform and SDK.

Community Contribution and Collaboration

Join our active community who are all working toward the goal of the global distribution of AI. Enjoy comprehensive documentation, tutorials, hackathons, and access to requests for AI services.

Create Your Own Organisation on the Blockchain

Set up your organization on the blockchain as either a company or an individual developer. Create, manage and collaborate with teams of contributors to create income streams.

Manage From Within One Environment

Create AI Services, configurations, demos, tutorials, pricing, all in one place. Publish & distribute AI services to the blockchain once, launch everywhere.

Monetize Your Services and Create Income Streams

Fully control the cost elements of your services, collect AGI tokens and transfer them to your preferred wallet and team members.

Access a Decentralized Distribution Channel and Global Market

Publish & distribute AI services to the blockchain where they are accessible by anyone with an internet connection. Developers are able to charge for the use of their services using the native AGI token.

Access to Comprehensive Documentation, Tools & SDKs

Wrap your AI algorithms in our native API using our SDK available in Java, C++, Go and Python as well as Mobile SDKs. our API allows interconnectivity with any other AI on our platform, compounding exponentially the power and potential of service creation.

Access a Community of AI Developers and Specialists

SingularityNET is a fully-fledged AI ecosystem with a rich community all working toward the global distribution of AI. Enjoy comprehensive documentation, tutorials, hackathons, and pick up work from requests for AI services.
